

LINE & STENCIL PAINTER

TRACKLESSVEHICLES.COM

The Trackless Line and Stencil Painter attachment is used for both straight line and stencil painting.

For straight line painting, simply remove the cart, set up the spray gun and proceed. For stencil painting, a hose reel and hand wand are provided. Stencils can be stored in one of the two storage drawers.

With attachments available for asphalt and concrete repair, sweeping, plowing and painting, a public works department equipped with a Trackless MT is more than capable of performing parking lot maintenance tasks which are often outsourced to property maintenance companies.
