

REAR MOUNT SIDEWALK SPREADER

TRACKLESSVEHICLES.COM

BUILT TO TACKLE WINTER'S TOUGHEST CHALLENGES.

The Rear Mount Sidewalk Spreader was specifically engineered for sidewalk applications. The Spreader conserves material by dispersing it evenly in a diamond pattern rather than a solid layer. The delivery roller maintains a 41" spread width, preventing material waste and turf damage from salt, both of which can be a problem with spinner spreaders. As a result, reduced labour and material requirements minimize the overall cost of operation.

As an option for the Spreader, the MT7 can be equipped with a ground speed-regulated controller.
