

TWIN AUGER SNOWBLOWER

TRACKLESSVEHICLES.COM

BUILT TO TACKLE WINTER'S TOUGHEST CHALLENGES.

The Twin Auger Snowblower is a highly efficient, two-stage snowblower. All widths will accept either a sidewalk or a truck-loading chute, and many municipalities utilize both chutes with their snowblower.

After clearing sidewalks, municipalities can change to the truck-loading chute to remove windrowed snow from streets or cul-de-sacs. In both cases, the manoeuvrability and physical size of the MT and Snowblower are less apt to create traffic congestion than larger snowblowers.
