

DUMP BODY

TRACKLESSVEHICLES.COM

YEAR-ROUND VERSATILITY.

The Trackless Dump Body is an option for municipalities wishing to double their Rear Mount Sidewalk Spreader's spread distance.

The operator spreads material until the Rear Mount Sidewalk Spreader is empty and can then refill the Spreader by hydraulically raising the Dump Body. The tailgate opens automatically and closes again once the Dump Body is lowered back into the rest position.

When the winter season is over, the Dump Body and its supporting frame can be unbolted and stored until the following winter.

Additionally, the Dump Body is used to house the 150-gallon Water Tank attachment.
